EDUCATION

Odisha University of Technology and Research

Bachelor of Technology in Computer Science and Engineering; CGPA: 9.01

Bhubaneswar, Odisha

2021–2025

Sai International School

Higher Secondary Education; Percentage: 89.67%

Bhubaneswar, Odisha

2019–2021

CERTIFICATIONS

- **Claude Certified Architect** — Anthropic | Issued June 2026 | Valid through Dec 2026

EXPERIENCE

Accenture

Associate Software Engineer

Oct 2025 – Present

Bhubaneswar, Odisha

- Architecting React Micro-Frontend (MFE) shell and remote apps using Module Federation, single-spa, and Webpack shared scope with dynamic manifest loading on a large-scale client product.
- Contributing to React Native (bare workflow) mobile development alongside the MFE web architecture.
- Owning sprint feature delivery on a client-facing React application, contributing to both architectural decisions and hands-on implementation.

Tech Stack: React 18, React Native, TypeScript, Webpack, Module Federation, single-spa, Tailwind CSS, SCSS, JavaScript

Accenture

Associate Software Engineer Intern

Feb 2025 – Jun 2025

Bhubaneswar, Odisha

- Contributed to UI development for the MOSOT product on the McDonald's project; identified and resolved critical bugs in the React.js-based interface.
- Collaborated across UI and data engineering teams to understand end-to-end product workflows and business data transformation pipelines.

Tech Stack: React.js, Python, Pandas, Matplotlib, JavaScript

Krescitius Technology Solutions (P) Ltd.

Software Engineer Intern

Apr 2024 – Jun 2024

Remote

- Built admin panel modules for Spenowr (social commerce platform): order dashboard reporting, and AWS Polly audio generation.

Tech Stack: Angular, PHP, AWS

PROJECTS

Nomad — AI Travel Itinerary App

GitHub — Live Demo

Tech Stack: React Native (Expo), Next.js, TypeScript, Node.js/Express, FastAPI, LangGraph, Supabase (PostgreSQL), Redis, Zustand, Tailwind CSS

- Built a full-stack AI travel app (web + mobile) with a 5-agent LangGraph pipeline (YouTube, Reddit, Google Blogs, Geo) running in parallel to synthesize day-by-day itineraries; deployed on Vercel + Railway.
- Engineered a Redis L1 destination cache (~10× latency reduction on repeat queries); polyglot microservice split with Node/Express owning auth/CRUD and FastAPI + LangGraph owning the agentic pipeline — model-agnostic.

Helix — AI Analytics Dashboard

GitHub — Live Demo

Tech Stack: React (Vite), TypeScript, FastAPI, DuckDB, SQLite, SSE, Recharts, Tailwind CSS, Zustand

- Built a conversational data analyst where users upload CSV/XLSX datasets and query in natural language; LLM generates SQL → DuckDB executes → schema-driven renderer (A2UI) streams charts inline via SSE.
- Hand-rolled SSE streaming (fetch + ReadableStream) with a 6-step orchestrator loop, SQL self-repair, SELECT-only safety guard, and multi-turn context feeding prior SQL to follow-up queries.

TECHNICAL PROFICIENCY

Languages: JavaScript, TypeScript, Python

Frontend: React 18, React Native, Next.js, Vite, Webpack, Module Federation, Tailwind CSS, SCSS, Shadcn UI, Framer Motion, Zustand, HTML/CSS

Backend & Tools: Node.js, Express.js, FastAPI, LangGraph, Supabase, Redis, Prisma ORM, Docker, Git, AWS, GCP
